A bottle in memory of the golden age

The bottle of our Maison Lémoviques fragrances is inspired by the the major works that took place in the heart of the city in the 19th century and ceramic. At the height of its economic and cultural golden age, the heart of Limoges was completely renovated in the style of the classical architecture of the time, with luxurious buildings featuring semicircular arches and cut stone. As the epicenter of the Haute-Vienne bourgeoisie and a vacation spot, Place Jourdan was home to Paris's biggest banks and a long list of hotels, each more prestigious than the last, that welcomed artists and intellectuals of all kinds.
